

AI Systems Architect Accelerator

Powered by Anthropic + Claude Code · 12-week, project-based program

\$149/mo

founding rate

Most people consume AI. Very few learn to build with it. Arrive in Week 1 with a real business problem and leave with a **deployed AI system, a GitHub portfolio, and the Anthropic Architect certification** — not a generic class project. Learn from Anthropic. Build through Colaberry. Deploy in the real world.

Founding seats

Membership includes

- ✓ Live training — full 12 weeks, all four intensives
- ✓ Anthropic Architect certification prep
- ✓ Full-time internship experience
- ✓ Guided GitHub portfolio projects

You'll build

- ✂ A Business Workflow Assistant + reusable AI Skills
- 👥 A multi-agent AI team + Enterprise Prompt Library
- 💻 A working MCP server, integrated with a real system
- 🛡 A complete Solution Architecture Package

Who it's for: career changers and working professionals comfortable with basic software concepts (git, command line) who have a business problem to solve. No professional engineering background required.

Founding membership

CONFIRMED PRICING

BEST VALUE

\$149/mo Annual

Billed for a full year. The founding rate locks for as long as you stay a member.

\$199/mo Monthly

Cancel anytime. Everything included in one membership — no separate course fees.

Plus student-paid third-party costs, not covered by Colaberry: an Anthropic subscription for Claude Code (about \$20/mo) and LLM API usage on your own key (most projects under \$10/mo), paid directly to the providers.

Founding Cohort — 40 seats only
