

Admissions call script

AI Systems Architect Accelerator — Founding Cohort. A guide, not a teleprompter. Listen more than you pitch; the script lines are starting points.

1

Open

Set the frame and earn the next two minutes.

"Hi [Name], this is [Your name] from Colaberry. Thanks for raising your hand on the AI Systems Architect Accelerator. I have got about ten minutes blocked for us. The goal of this call is simple: figure out whether the Founding Cohort is the right room for what you are trying to do. Sound good?"

2

Discovery

Find their problem and their bar. Take notes; you will sell with their words.

- "Where are you today with AI, and what made you look at this now?"
- "Is there a specific problem or idea you would want to build during the program?"
- "What does a great outcome 12 weeks from now look like for you?"
- "How comfortable are you with the basics, things like git and the command line?"
- "What is your time like on a normal week?"

Listen for: a real problem to build on, the motivation (career move, raise, launch an idea), and any blocker (time, money, confidence). You will tie the pitch and the close back to these.

3

Pitch — tied to what they said

Sell the outcome, not the syllabus. Use their problem from step 2.

"Here is how it works. It is a 12-week, project-based program powered by Anthropic and Claude Code. Four hours of live training a week, Monday Architecture Day and Thursday Build Day. You do not build a toy class project. You build [their problem]. By the end you have a deployed AI system, a GitHub portfolio, and you prepare for the Anthropic Architect certification. The way we say it: Anthropic certifies your knowledge, Colaberry certifies your capability. Everything is one membership. No separate course fees."

If it helps, name what they will walk out having built: a Business Workflow Assistant with reusable AI Skills, a multi-agent AI team, a working MCP server, and a full Solution Architecture Package.

4

Bridge the objection

Acknowledge, answer with proof, return to their goal. Full answers are on the objection sheet.

Pattern: "That is fair." → one-line answer → "...which is exactly why this gets you to [their goal]."

- **Price:** "It is not a course fee. One monthly price covers all four intensives, the certification prep, the internship, and your portfolio."

- **Time:** "Four hours a week, and the hours go into your own project, not homework."
- **Background:** "It is built for career changers. If you are comfortable with git and the command line and you have a problem to solve, you are qualified."
- **Cancellation:** "The monthly plan cancels anytime." (*Confirm annual refund terms with Ali before quoting.*)

5

Close on scarcity, not pressure

The founding offer does the work. Ask for the decision.

"Two honest reasons to decide now rather than later. The Founding Cohort is capped at 40 seats, and the \$149/mo founding rate locks for as long as you stay a member, even when the price goes up for later cohorts. The free Open House is July 16, and the cohort kicks off July 23. Based on what you told me about [their goal], I think you would be a strong fit. Do you want me to hold one of the founding seats for you?"

6

Enrollment + next step

Never end a yes (or a maybe) without a concrete next action.

- **If yes:** "Great. Enrollment runs through training.colaberry.com. I will [send the link / walk you through it now] so your founding seat is locked." Confirm they completed it before the call ends.
- **If maybe:** book the next step before you hang up (a follow-up call, or send the one-pager and set a decision date). Note their reason so we can follow up well.
- **If no:** ask what would have to be true for it to be a yes, log it, and leave the door open.

One CTA everywhere: training.colaberry.com. One ask per call. Always leave with a scheduled next step.
