Week 1 · Claude Code Foundations

INTENSIVE 1

ANTHROPIC · SKILLJAR

Goal: Stand up Claude Code on your own project, run the build loop (prompt → diff → commit), and connect GitHub so your pushes start verifying requirements.

COURSE

ANTHROPIC · SKILLJAR

OPEN

Take the Anthropic course for the week

The read/watch layer. Opens in a new tab on Anthropic's Skilljar LMS — you stay enrolled there; we wrap it with the quiz and lab below.

Claude Code 101 (+ Claude Code in Action)

anthropic.skilljar.com/claude-code-101

LINK CONFIRMED

[↗](#) **Opens in a new tab on Skilljar.** Per the locked delivery decision (deep-link v1), we link out — no separate login wall expected for enrolled students. Completion for this week is confirmed by your post-quiz below; automatic Skilljar progress sync is a P1 upgrade.

📁 LAB · BUILD IT

● BUILD DAY · THU

🕒 IN PROGRESS

Build it on *your* project

Apply the week to your own capstone project — not a throwaway exercise.
Scored on-site; produces this week's Tier-A artifact for your portfolio.

```
# Your Claude Code starter prompt for this lab (auto-tailored to your project)
```

Goal: Set up Claude Code in your project repo, configure CLAUDE.md, and run one build-loop: turn a single requirement into a verified diff, commit, and push.

Resources: your repo · GitHub connection · this week's course

Definition of done: 1 requirement flips to VERIFIED on push

Tier-A artifact: Working Claude Code build loop + first verified requirement

Auto-collected into your portfolio when the lab is scored · gradeable & comparable across the cohort

● TIER A

🕒 ~60 min ✓ Scored on-site **+90 pts**

[📁 Open the lab](#)[📄 Copy Claude Code prompt](#)

3

📺 RECORD & CRITIQUE

AI VIDEO CRITIQUER

○ NOT STARTED

Record a 2-min demo of your build

Record a short demo of what you built this week — or answer a common interview question. The AI Video Critiquer scores your delivery (pacing, clarity, filler words) and files the clip to your portfolio.

Record a take — or upload a clip. AI delivery feedback in ~1 min.

🕒 ~5 min 📄 Transcript + audio feedback · visual P1 **+60 pts**

[🎤 Record a take](#)[👁 See sample feedback](#)

4

✅ PROVE IT · POST-QUIZ + SURVEY

🔒 UNLOCKS AFTER LAB

10-question post-quiz + reflection survey

The wrapper that gates the week. The 10-q post-quiz is our completion signal for the course; the short reflection survey closes the loop.

1 Which command runs a single build-loop step?

2 A push verifies a requirement when...

... +8 more · then reflection

🕒 ~12 min 10-q quiz + 3-q survey **+120 pts**

5

🎙️ AI MOCK INTERVIEW **AI · SECTION INTERVIEW**

🔒 UNLOCKS AFTER QUIZ

AI mock interview — Claude Code Foundations

An AI interviewer asks you a few questions on this week's topic, scores your answers against a rubric, and emails you results. This is where you practice **saying** what you built — the way a real interview will ask.

q1 Walk me through the Claude Code build loop you used this week.

q2 How does a push end up verifying a requirement in your project?

... + more · then a rubric-scored summary emailed to you

📘 **Launch-min:** typed answers + a deterministic rubric score, results emailed. Spoken / voice interviews are a fast-follow (P1). Pairs with the **Record & critique** activity above for delivery practice.

🕒 ~10 min ☒ AI interviewer · rubric-scored **+80 pts**

▶ Start the interview

6

★ WEEK COMPLETE · FINISH

🔒 LOCKED

Artifact filed · readiness updated · next week unlocks

Finishing your activities files your Tier-A artifact to your portfolio, banks your quiz + interview scores into your readiness score, and drips Week 2 onto your dashboard.

✓ Complete Week 1

Finish all 5 activities to complete the week

 **Visibility drives your timeline.** Content stays open across every section; activities reveal as you complete them. Anything not visible on this page won't appear in your main timeline — so your "today" view never lists work you haven't unlocked yet.
