

Outbound templates — Founding Cohort

Three persona variants, each with an email and a short DM. Replace [Name] and the sender signature before sending.

 **DRAFT** — Ali approves before any send

1 • Working Professionals

Angle: build with AI without leaving your job. Four hours a week. Lock the founding rate.

Subject: Build with AI in 12 weeks, without quitting your job

Preview: Four hours a week. A real, deployed system at the end. 40 founding seats.

Hi [Name],

Most professionals are using AI tools by now. Far fewer can actually build with them, and that gap is what gets noticed at work.

The AI Systems Architect Accelerator, powered by Anthropic and Claude Code, is a 12-week, project-based program built around exactly that. The live commitment is four hours a week: Monday Architecture Day and Thursday Build Day. You bring a real problem from your own work and leave with a deployed AI system, a GitHub portfolio, and the Anthropic Architect certification.

We are opening the Founding Cohort with 40 seats. Founding members lock the \$149/mo founding rate for as long as they stay a member, even as the price rises for later cohorts. The free Open House is Thursday, July 16, and the Founding Cohort kicks off Thursday, July 23, 2026.

Want me to hold a seat while you decide? Reply here, or claim one directly at training.colaberry.com.

LinkedIn / short DM:

Hi [Name], quick one. We are opening a 40-seat Founding Cohort for our AI Systems Architect Accelerator (powered by Anthropic + Claude Code). Four hours a week for 12 weeks, and you finish with a deployed AI system and a portfolio, not just notes. Founding rate is \$149/mo and it locks for life. Free Open House is July 16. Want the details?

2 • Beginners / Career Switchers

Angle: no engineering background needed. Go from consuming AI to building it.

Subject: No engineering degree? You can still learn to build AI

Preview: Built for career changers. You finish with a real project to show.

Hi [Name],

If you have been wanting to move into AI but assumed you need an engineering background, this is built for you.

The AI Systems Architect Accelerator is a 12-week, project-based program for career changers and working professionals. You need to be comfortable with basic software concepts like git and the command line, and you need a problem you want to solve. That is the bar. From there we take you from consuming AI to building with it, live, with feedback.

You finish with a deployed AI system, a GitHub portfolio, and the Anthropic Architect certification. Anthropic certifies your knowledge. Colaberry certifies your capability, through a project you actually shipped.

We are opening 40 founding seats at a \$149/mo founding rate that locks for as long as you stay a member. The free Open House is Thursday, July 16, and the Founding Cohort kicks off Thursday, July 23, 2026.

Reply and I will walk you through whether it is a fit, or claim a seat at training.colaberry.com.

Hi [Name], saw you are interested in moving into AI. You do not need an engineering background for our Accelerator, just comfort with the basics (git, command line) and a problem to solve. 12 weeks, and you leave with a deployed project and the Anthropic Architect certification. 40 founding seats at \$149/mo, locked for life. Want me to send the one-pager?

3 • Builders / Idea-Owners

Angle: bring your idea, leave with a deployed system + architecture package.

Subject: Bring your idea. Leave with a deployed AI system.

Preview: A multi-agent team, a working MCP server, a full architecture package.

Hi [Name],

You already have the idea. What is missing is the build.

In the AI Systems Architect Accelerator you arrive in Week 1 with your real business problem and spend 12 weeks turning it into working software. By the end you have built a Business Workflow Assistant with reusable AI Skills, a multi-agent AI team with an Enterprise Prompt Library, a working MCP server integrated with a real system, and a complete Solution Architecture Package. It is powered by Anthropic and Claude Code, and you prepare for the Anthropic Architect certification along the way.

The Founding Cohort is 40 seats. Founding members lock the \$149/mo founding rate for as long as they stay a member. The free Open House is Thursday, July 16, and the Founding Cohort kicks off Thursday, July 23, 2026.

If you tell me what you are trying to build, I can tell you in two minutes whether this is the right room for it. Or claim a seat at training.colaberry.com.

Hi [Name], you have the idea. Our Accelerator is where you build it. 12 weeks, and you walk out with a deployed system, a multi-agent AI team, a working MCP server, and a full architecture package, powered by Anthropic + Claude Code. 40 founding seats, \$149/mo locked for life, free Open House July 16. What are you trying to build?

Notes for the sender: Personalize the first line with something specific to the recipient. Keep one ask per message. If there is a live info session or Open House date to offer as a soft step before checkout, add it under the CTA — leave it out rather than guess a date.
